

S-tube - carrying by airplane

The original S-tube-CO₂ Cartridges contain 16g of CO₂ and are pressurized. In air travel, they are regarded as hazardous material. However, according to the IATA, up to 3 CO₂ cartridges may be carried on an airplane.

IATA provision, table 2.3.A(subsection 2.3), 31.12.2013 "Small non-flammable gas cylinders, containing carbon dioxide or other suitable gas in Division 2.2. Up to two(2) small cylinders fitted into a life jacket, and up to two(2) spare cartridges per person, not more than four(4) cylinders up to 50ml water capacity for other devices."

- Permitted in or as carry-on baggage
- Permitted in or as checked baggage
- Permitted on one's person
- The approval of the operator(s) is required!
